ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 43/86.
Exemption—The Metropolitan Toronto and Region Conservation Authority —MTRCA-2.
Made—January 24th, 1986.
Filed—January 30th, 1986

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—THE METROPOLITAN TORONTO AND REGION CONSERVATION AUTHORITY—MTRCA-2

Having received a request from The Metropolitan Toronto and Region Conservation Authority that an undertaking, namely:

> The activity of providing slope stabilization and table land protection by means of channelization and stabilizing buttresses at Bellamy Ravine between the Lake Ontario shoreline and Kingston Road in the City of Scarborough,

be exempt from the application of the Act pursuant to section 29; and having been advised by the proponent that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. Property owners are injured by the steady erosion of the narrow buffer between their properties and the ravine resulting in decreasing property values and the possibility their homes may become unsaleable.

B. The threat to the existing houses increases monthly as the ravine crest continues to erode towards or into the backyards of homes in the area.

C. Sedimentation and sediment loading to Lake Ontario from erosion in Bellamy Ravine will continue to impair local water quality in the Lake.

D. The erosion and sediment control program of The Metropolitan Toronto and Region Conservation Authority will be interfered with, as funding for the proposed remedial measures comes from both municipal and provincial sources, thereby leading to lengthy approval processes and the risk of reallocations to other projects, if planned works do not proceed on schedule.

E. The Metropolitan Toronto and Region Conservation Authority will be interfered with because delayed implementation of the project will result in increasing severity of the problem, as well as increased costs and complexity of the remedial work.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. Further delay required to undertake an environmental assessment would result in increased severity of the problem, causing additional property losses and devaluation and could potentially jeopardize existing structures.

B. The existing environment is already highly disturbed as a result of natural and man induced erosion processes and therefore the impact of the proposed activity will be low. The Metropolitan Toronto and Region Conservation Authority advises that the stabilization works will have a net environmental benefit in terms of sediment control, land conservation and reduction of hazard to life.

C. The successful completion of the activity will result in a reduction in sediment and associated pollutants to Lake Ontario.

D. Further delay will result in increased costs and complexity of the remedial work.

This exemption is subject to the following terms and conditions:

1. Where any activity which otherwise would be exempt under this order, is being carried out as or is part of, an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.

2. Fill material required for construction will be properly drained, compacted and stabilized using drainage tile, rip rap and other coarse material to minimize sediment losses during the construction period.

3. The MTRCA shall through written notice inform the Director of the Environmental Assessment Branch that they have complied with the requirements of conditions 2 and 3. MTRCA shall also, by written notice, notify the Director of Central Region, Ministry of

the Environment, of the construction commencement date at least seven days prior to that date. O. Reg. 43/86.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 44/86.
Exemption—Township of Rutherford and George Island—RUTH-1.
Made—January 24th, 1986.
Filed—January 30th, 1986.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—TOWNSHIP OF RUTHERFORD AND GEORGE ISLAND—RUTH-1

Having received a request from the Corporation of the Township of Rutherford and George Island that an undertaking, namely:

> The activity of establishing a sanitary sewage system by the Township of Rutherford and George Island consisting of a sewage collection system, and a two-cell waste stabilization pond to be located on property east of Lot 29, Plan 51 adjacent to the Noble Subdivision, to serve the Community of Killarney,

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The public health and safety will be interfered with by any delay in establishing the sewage collection and waste treatment system in the Community of Killarney.

Having weighed such injury, damage or interference againt the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. The undertaking is needed to overcome problems associated with existing inadequate private sewage disposal systems in the Community of Killarney.

B. The undertaking will have a beneficial effect on the environment and public health within the Community.

This exemption is subject to the following terms and conditions:

1. Construction work shall proceed in accordance with the Ministry of the Environment publication "Environmental Considerations for Planning the Construction of Provincial Sewage and Water Projects", Fourth Edition, January, 1985.

2. The proponent shall advise the Director of the Environmental Assessment Branch in writing of how the requirements of Condition 1 were met.

3. This exemption shall terminate on December 31, 1986 if construction of the project has not commenced by that date. O. Reg. 44/86.

(7) A claim against the Fund may only be made by a claimant giving written notice of the claim to the Registrar supported by an affidavit in the form provided by the Minister and such other material as may be required by the Board for transmittal to the Board with full particulars thereof and of any payment recovery in respect thereof and the Trustee may require as a condition precedent to making payment of the claim or any part thereof, the delivery and execution of such documents as the Trustee in its discretion or upon the advice of its counsel considers necessary including documents as are necessary for transferring to the Trustee the interest of the claimant in the claim so as to subrogate the Trustee to the position of the claimant against the participant.

(8) No amount shall be paid out of the Fund until the claimant assigns to the Fund any judgment or other right of any kind that the claimant has against the participant or any other person in respect of the claimant's claim.

(9) Notwithstanding subsections (6) and (7), the Board may on any claim require that the claimant,

(12) Where any amount is recovered from any other source in partial satisfaction of the total claim against a participant, the maximum amount authorized by clause (10) (*a*) is reduced by the amount so recovered.

13.—(1) Where it appears to the Director or the Board that a customer of a participant will be entitled to claim against the Fund, and that the customer has been placed in circumstances where immediate funds or service are necessary to alleviate undue inconvenience of the customer, the Board, with the concurrence of the Director, may direct the Trustee to pay out of the Fund an amount sufficient to alleviate such immediate inconvenience.

(2) Notwithstanding the provisions of subsection 6 (1) of this Schedule with respect to a quorum of the Board, where a quorum of the Board is not available, the powers set out under subsection (1) of this section

(3) Where a payment is made out of the Fund, the Board is subrogated for the amount of the payment, to any and all rights or remedies to which the person receiving the payment is entitled in respect of the claim for which the payment was made, including rights and remedies as judgment creditor or execution creditor in respect of any judgment that has been assigned under subsection 12 (8) of this Schedule against the participant or any other person or in the event of the death, insolvency, bankruptcy or other disability of the participant or other person, against the personal representative or other person administering the estate of the participant.

HEARING BY TRIBUNAL

15.—(1) Where the Board determines that a claim or any part thereof made under section 12 is not a proper claim, it shall serve notice of its decision, together with written reasons therefor, on the claimant and the notice shall inform the claimant that the claimant is entitled to a hearing by the Tribunal if the claimant mails or delivers to the Registrar and the Tribunal within fifteen days after the notice is served on the claimant, notice in writing requiring a hearing.

(2) Where a claimant who has been served with a notice under subsection (1) does not require a hearing, the Tribunal shall not hold a hearing and the decision of the Board is final after the fifteenth day after the notice is required to be served.

(3) Where a claimant requires a hearing before the Tribunal under subsection (1), the Tribunal shall appoint a time for and hold the hearing and, after affording the claimant an opportunity to be heard, may confirm the determination of the Board or may set aside the determination of the Board with respect to all or any part of a claim and direct the Trustee to pay the amount determined by the Tribunal.

18. A dealer who ceases to participate in the Fund shall file with the Board, the Trustee and the Registrar such financial statements and other evidence as the Board and the Director may in their discretion require to establish that the affairs of the dealer are settled and that there are no claims on the Fund and that arrangements satisfactory to the Board and the Director have been made to ensure that all liabilities and obligations of the dealer that could give rise to any such claim have been met and discharged.

(*k*) do any act in addition to those referred to in clauses (*a*) to (*j*) with respect to any property in the Fund necessary to protect the investment of the Fund.

(2) The Trustee shall ensure that its books and records clearly identify all approved securities and property howsoever held by it that are part of the Fund.

21.—(1) The Trustee's fee for performing its duties under this Schedule shall be such as may be mutually agreed upon from time to time between the Director, the Board and the Trustee and in default of such agreement, such fee as shall be determined by the Director.

(2) In addition to the fee referred to in subsection (1), the Trustee is entitled to be reimbursed for any and all costs, charges and expenses reasonably incurred by the Trustee in the performance of its duties under this Schedule.

Parliamentary Notice
Royal Assent

THE PROVINCE OF ONTARIO

Toronto, February 12th, 1986.

5.50 p.m.

The Honourable the Lieutenant Governor of the Province entered the Chamber of the Legislative Assembly and took his seat upon the Throne.

Mr. Speaker addressed His Honour in the following words:—

"May it please Your Honour:

The Legislative Assembly of the Province has at its present sittings thereof passed certain Bills to which, in the name and on behalf of the said Legislative Assembly, I respectfully request Your Honour's Assent".

The Assistant Clerk then read the titles of the Bills that had passed as follows:—

"The following are the titles of the Bills to which Your Honour's Assent is prayed:

Bill 3, An Act respecting Actions arising from Transboundary Pollution between Ontario and reciprocating Jurisdictions.

Bill 16, An Act to amend the Public Commercial Vehicles Act.

Bill 76, An Act to amend the Public Service Superannuation Act.

Bill 103, An Act to amend the Teachers' Superannuation Act, 1983.

Bill 107, An Act to amend the Municipal Act."

To these Acts the Royal Assent was announced by the Clerk of the Legislative Assembly in the following words:

"In Her Majesty's name, the Honourable the Lieutenant Governor doth assent to these Bills."

Mr. Speaker then said:

"MAY IT PLEASE YOUR HONOUR:

We, Her Majesty's most dutiful and faithful subjects, the Legislative Assembly of the Province of Ontario, in session assembled, approach Your Honour with sentiments of unfeigned devotion and loyalty to Her Majesty's person and Government, and humbly beg to present for Your Honour's acceptance a Bill intituled, 'An Act for granting to Her Majesty certain sums of money for the Public Service for the fiscal year ending 31st day of March, 1986' (Bill 110)."

To this Act the Royal Assent was announced by the Clerk of the Legislative Assembly in the following words:—

"The Honourable the Lieutenant Governor doth thank Her Majesty's dutiful and loyal subjects, accept their benevolence and assent to this Bill in Her Majesty's name."

The Honourable the Lieutenant Governor was then pleased to deliver the following gracious speech:—

Mr. Speaker and Members of the Legislative Assembly:

I am pleased to address you for the first time and take this opportunity to look back on some of the work completed during the First Session of the Thirty-third Parliament of Ontario.

My Government has given priority to the objective of setting this Province on a course aimed at achieving the aspirations of its people—the goals of a strengthened economy, open Government, clean environment, and creation of opportunities for all.

The co-operation and participation of all Members have contributed to the effort to achieve these

objectives. For that dedication to duty, you are to be commended.

The Treasurer's 1985 budget dealt with the need to encourage increased economic activity and improve services essential to the health and well-being of the people of Ontario, in a framework of fiscal responsibility.

The financial statement brought greater clarity to the Province's accounting and budgeting procedures, and eliminated some outstanding financial obligations, including the note on the Province's interest in Suncor Oil.

Ontario's 8 per cent unemployment rate in 1985 was the lowest in four years, and the 7.3 per cent adjusted rate last month was the lowest in 50 months.

The Government has set the stage for long-term development through the budget and other measures, including:

—the futures program, to provide meaningful jobs and training opportunities for hard-to-employ young people;

—the establishment of funds totalling $80-million to promote excellence in colleges and universities;

—a $50-million program to help farmers cope with high interest rates; a $20-million allocation for Ontario red-meat producers through the tripartite stabilization plan; a $6-million transition fund for Tobacco growers and other farmers leaving agriculture; and a policy to preserve needed farmland;

—the creation of a $100-million Northern Development Fund; and expansion of the roles of the Small Business Development Corporations in the north and the east.

During this session, a concerted drive was launched to improve Government efforts to meet the basic needs of the people of this Province, including:

—introduction of the comprehensive "Assured Housing for Ontario Program"; expansion of rent review; and funding to aid the construction of at least 10,000 additional non-profit housing units;

—the initiation of a process to create 10,000 additional spaces in child-care facilities over three years, and preparations to open a daycare center at Queen's Park;

—introduction of legislation to eliminate extra-billing by doctors; allocation of an 8.3 per cent increase in Provincial funding for Ontario hospitals; subsidies to northern residents who have to travel more than 300 kilometres to receive necessary medical care; and introduction of legislation to ensure realistic drug prices, protect consumers and bring sound management to the Government's Drug Benefit Plan;

—initiation of studies to improve our ability to provide services to senior citizens in their homes; and allocation of an additional $11 million for services to senior citizens;

—introduction of legislation to tie workers' compensation benefits to inflation;

—increased family benefits, and additional assistance to provide winter clothing for children;

—and introduction of legislation to provide for arbitration of first-contract disputes.

This session also saw determined efforts to protect and preserve our environment and natural resources, including:

—proclamation of an amendment to the Environmental Protection Act to ensure that those responsible for chemical spills are also responsible for cleaning them up;

—a new program—"Countdown Acid Rain" —requiring Ontario's four major producers of sulphur dioxide to sharply reduce emissions;

—release of an independent audit of the Province's forests and their management;

—an agreement with the state of Michigan to help combat trans-boundary air pollution, and prevent chemical spills in boundary waters;

—and a policy to regulate the production of soft drink containers to stimulate a province-wide recycling program while protecting the interests of the steel industry and its workers.

During this session, considerable activity was devoted to achieving equal rights for all, including;

—a $1-million grant to the Women's Legal Education and Action Fund, to support cases brought by Ontario women based on women's rights guarantees in the Canadian Charter of Rights and Freedoms;

—tabling of a Green Paper on Pay Equity, and introduction of legislation to provide for that principle in the public sector;

—and proclamation of a Family Law Reform Act, bringing our statutes into line with principles of fairness and equity.

We have also seen considerable progress in opening the process of Government to the people it serves, including:

—introduction of Freedom of Information and Privacy Legislation;

—the release of 30 public opinion surveys conducted over the past three years and paid for by public funds;

—and introduction of television in the legislature for a trial period to set the basis for full-time broadcast.

At the same time, the goal of encouraging and promoting the province's cultural development has been furthered, through such measures as:

—the creation of the Ontario Film Development Corporation;

—allocation of an additional $2 million to the Ontario Arts Council to fund small and middle-sized arts agencies and organizations;

—and initiation of a "Dialogue on Multiculturalism" with representatives of 21 communities across the province.

Honourable Members, your efforts to improve the quality of life in this Province have been admirable, and your achievements have been considerable.

Au nom de notre Souveraine, Je vous Remercie.

In our Sovereign's name, I thank you.

Je declare cette session prorogée.

I now declare this session prorogued.

The Government House Leader then said:—

Mr. Speaker and Members of the Legislative Assembly:

It is the will and pleasure of the Honourable the Lieutenant Governor that this Legislative Assembly be prorogued and this Legislative Assembly is accordingly prorogued.

(2) The other area director referred to in subsection (1) may issue a certificate to the applicant in accordance with the application and other material received under subsection (1) and shall act and proceed as if the application had been made to that area director by the applicant in the first instance.

(3) When an area director has issued a certificate and it thereafter appears to the area director that the functions of the area director in connection with that certificate can be performed more conveniently by another area director, the area director may transfer that certificate and all files in connection therewith to another area director and that other area director may thereafter perform all the functions of an area director in connection with that certificate.

Notice of Garnishment

Form 42 (page 2)

Court file no.

Courts of Justice Act, 1984

IF YOU FAIL TO OBEY THIS NOTICE, THE COURT MAY MAKE AND ENFORCE AN ORDER AGAINST YOU for the amount unpaid and the court costs incurred by the creditor.

IF YOU MAKE PAYMENT TO ANYONE OTHER THAN THE CLERK OF THE COURT AFTER SERVICE OF THIS NOTICE ON YOU, YOU MAY BE LIABLE TO PAY AGAIN.

TO ALL PARTIES:

The payments owing are for support or maintenance. Accordingly, where the garnishee is the debtor's employer, section 7 of Ontario's Wages Act states that fifty per cent of any wages due to an employee is **EXEMPT** from garnishment or seizure. This exempt portion may be increased or decreased by an order of the court. If a copy of such an order of the court is attached to this notice, the garnishee must comply with the percentage of the exemption stated in that order.

The Creditors' Relief Act states that support or maintenance orders have priority over other judgment debts, regardless of when an enforcement process is issued or served. Where the support or maintenance order is for a lump sum payment, the priority is for the amount of the lump sum. Where the order is for periodic payments, the priority is for an amount up to one year's support or maintenance at the rate current when this notice of garnishment is served on you.

Support or maintenance orders rank equally with one another.

If the debtor disputes for any reason that this notice of garnishment is correct or that support or maintenance is payable, he or she must, within ten days after service of this notice, file with the clerk of the court a dispute in Form 40 accompanying this notice. If the dispute form is missing, the debtor should contact his or her own lawyer or the court office.

Where the garnishee or the debtor files a dispute, or where the garnishee does not make the payment required by this notice, the clerk of the court will issue a notice of garnishment hearing in Form 41 for a hearing before the court to determine the rights [illegible]

Where there is a material change in the circumstances of the debtor or of the creditor, a motion may be made to the court to vary or to suspend any term of the garnishment.

The total amount of all payments is not to exceed: *(insert total amount claimed by creditor)* $

☐ The creditor claims that you owe or will owe the debtor a salary, a pension or other periodic debt
YOU ARE COMMANDED TO DEDUCT, for a period of six years after service of this notice upon you, from all wages, pension payments or any other periodic debt payments due from you to the debtor:
a) to meet the periodic payments enforced by the garnishment filed with this court, the sum of $ eac

b) you owe or will owe the debtor less that the amount that he/she is alleged to owe to the creditor, or
c) you have a defence or a right of set-off against the debtor,

you must, within ten days after service of this notice on you, pay to the clerk of the court whatever amount that you admit to be owing or accruing due to the debtor, and you must, at the same time, serve on the creditor and file with the clerk of the court a dispute in Form 40 accompanying this notice. Notice of Garnishment

Form 39 (page 2)

IF YOU FAIL TO OBEY THIS NOTICE, THE COURT MAY MAKE AND ENFORCE AN ORDER AGAINST YOU for the amount unpaid and the court costs incurred by the creditor.

IF YOU MAKE PAYMENT TO ANYONE OTHER THAN THE CLERK OF THE COURT AFTER SERVICE OF THIS NOTICE ON YOU, YOU MAY BE LIABLE TO PAY AGAIN.

TO ALL PARTIES:

The payments owing are for support or maintenance. Accordingly, where the garnishee is the debtor's employer, section 7 of Ontario's Wages Act states that fifty per cent of any wages due to an employee is **EXEMPT** from garnishment or seizure. This exempt portion may be increased or decreased by an order of the court. If a copy of such an order of the court is attached to this notice, the garnishee must comply with the percentage of the exemption stated in that order.

The Creditors' Relief Act states that support or maintenance orders have priority over other judgment debts, regardless of when an enforcement process is issued or served. Where the support or maintenance order is for a lump sum payment, the priority is for the amount of the lump sum. Where the order is for periodic payments, the priority is for an amount up to one year's support or maintenance at the rate current when this notice of garnishment is served on you.

Support or maintenance orders rank equally with one another.

If the debtor disputes for any reason that this notice of garnishment is correct or that support or maintenance is payable, he or she must, within ten days after service of this notice, serve on the creditor a dispute in Form 40 accompanying this notice and file it, with proof of service, with the clerk of the court. If the dispute form is missing, the debtor should contact his or her own lawyer or the court office.

Where the garnishee or the debtor files a dispute, or where the garnishee does not make the payment required by this notice, the clerk of the court will issue a notice of garnishment hearing in Form 41 for a hearing before the court to determine the rights of the parties.

Where there is a material change in the circumstances of the debtor or of the creditor, a motion may be made to the court to vary or to suspend any term of the garnishment.

A garnishment has been issued by a court outside Ontario to recover support or maintenance payments owed by the debtor to the creditor. In order to enforce that garnishment this court has issued this notice of garnishment against you to seize any debt that you owe or will owe to the debtor.

(check off one or both boxes below, as appropriate)

☐ The creditor claims that you owe or will owe the debtor a lump sum.
YOU ARE COMMANDED TO PAY to the clerk of the court:

b) within ten days after the debt becomes payable, all debts due from you to the debtor for a period of six years after service of this notice upon you.
The total amount of all payments is not to exceed: *(insert total amount claimed by creditor)* $

☐ The creditor claims that you owe or will owe the debtor a salary, a pension or other periodic debt
YOU ARE COMMANDED TO DEDUCT, for a period of six years after service of this notice upon you, from all wages pension payments or any other periodic debt payments due from you to the debtor:
a) to meet the periodic payments enforced by the garnishment filed with this court, the sum of $ _____ each *(month, week, etc.)* beginning on *(date)* _____, 19 _____
and continuing until further order of the court, and
b) to pay off any lump sum, arrears, court costs and interest enforced by that garnishment, the further sum of $ _____ each *(month, week, etc.)* beginning on *(date)* _____, 19 _____
and continuing until *(date)* _____, 19 _____, or until further order of the court,
and to pay these amounts to the clerk of the court within ten days after the wages, pension payments or other periodic debt becomes payable by you to the debtor.

If a) you dispute, for whatever reason, the claim that you owe or will owe a debt to the debtor, or
b) you owe or will owe the debtor less that the amount that he/she is alleged to owe to the creditor, or
c) you have a defence or a right of set-off against the debtor,
you must, within ten days after service of this notice on you, pay to the clerk of the court whatever amount that you admit to be owing or accruing due to the debtor, and you must, at the same time, serve on the creditor and file with the clerk of the court a dispute in Form 40 accompanying this notice. Occupational Health and Safety Act

March 15, 1986

MINISTRY OF LABOUR

NOTICE OF PROPOSED REGULATION

RESPECTING STYRENE

Notice is hereby given of the following proposed regulation relating to the designation of styrene under section 22(a) of the Occupational Health and Safety Act, R.S.O. 1980, c. 321 (the Act).

The government is committed to an open and consultative process for the development of designated substance regulations on the basis that this is more likely to result in quality regulations which are more understandable and acceptable to the affected parties. In order to ensure the most expeditious development of this regulation, dates have been specified in the next paragraph when certain steps in the process are expected to take place. These dates will be adhered to.

All comments that are received in response to this notice will be analyzed and any proposed amendments arising from these comments will be presented at a public meeting to take place not later than September, 1986 for review and further comment. The comments will be analyzed and the regulation may be further revised. It is intended that the regulation will be transmitted to the Advisory Council on Occupational Health and Occupational Safety by January, 1987.

The Ministry welcomes comments on all aspects of the proposed regulation. It wishes to receive information and comments on four particular issues.

- First, is it appropriate and feasible to allow 3 years for the reinforced plastic products industry, which includes boat building, to achieve a time-weighted average (TWA) exposure limit of 50 ppm? The Ministry is particularly interested in receiving advice on whether the definitions of "fibrous reinforcing agent" and "plastic material" are comprehensive or require modification to ensure that the appropriate industrial sectors and products are included.

- Second, is it feasible for the reinforced plastic products industry to meet a TWA exposure limit of 100 ppm once the regulation is in effect?

- Third, is it feasible for other industrial sectors to meet a TWA exposure limit of 50 ppm?

- Fourth, should medical surveillance be required, and under what circumstances? This proposed regulation provides that if a worker, a worker's physician, or an employer believes that the worker's health may have been affected by inhalation, absorption of, or contact with styrene, the worker must undergo a medical examination and clinical tests to determine whether the worker should be removed from styrene exposure. A mandatory medical surveillance program for all workers would not be required.

Additional background information is available for review during business hours in the Ministry of Labour Library at 400 University Avenue, 10th Floor, Toronto, Ontario, and district offices of the Ministry. If these hours are not convenient, please contact Dr. Shal Gewurtz at the number below.

Comments on the proposed regulation or any particular sections therein must be submitted by June 13, 1986 to:

Designated Substances Project
Program Development Unit
Ministry of Labour, 9th Floor
400 University Avenue
Toronto, Ontario
M7A 1T7

Comments received will be made available for public examination after the close of the public comment period.

For further information contact Dr. Shal Gewurtz, Toronto (416) 965-8710.

PROPOSED REGULATION RESPECTING STYRENE - MADE UNDER THE OCCUPATIONAL HEALTH AND SAFETY ACT

MINISTRY OF LABOUR

OCCUPATIONAL HEALTH AND SAFETY DIVISION

March 15, 1986

PROPOSED REGULATION MADE UNDER THE OCCUPATIONAL HEALTH AND SAFETY ACT

DESIGNATED SUBSTANCE - STYRENE

1. In this Regulation,

(a) "control program" means a styrene control program required by this Regulation;

(b) "fibrous reinforcing agent" means an agent such as glass fibre or other fibrous substance used to strengthen a plastic material;

(c) "joint health and safety committee" includes a joint health and safety committee established under section 8 of the Act, or a committee of like nature or an arrangement, program or system in which the workers participate that conforms to subsection 8(2) of the Act;

(d) "m^3" means cubic metre;

(e) "mg" means milligrams;

(f) "plastic material" means a synthetic resinous polymeric substance that can be shaped or moulded.

2. Styrene is prescribed as a designated substance.

3. (1) Subject to subsection (3), this Regulation applies to every employer and worker at a work place where styrene is present, produced, processed, used, handled or stored and at which a worker is likely to inhale or come into contact with and absorb styrene.

(2) Subject to subsection (3), an employer to whom this Regulation applies shall take every precaution reasonable in the circumstances to ensure that every worker who is not an employee of the employer but who is working in the work place of the employer and is exposed to styrene and whose health is likely to be affected thereby is protected and the worker shall comply with the requirements of the employer.

(3) Subsection (2) and sections 4 to 17 do not apply to an employer or to the workers of an employer who primarily carries on the business of construction.

4. (1) Subject to subsection (2) every employer shall take all necessary measures and procedures by means of engineering controls, work practices and hygiene practices and facilities to ensure that the time-weighted average exposure of a worker to airborne styrene shall not exceed 50 parts styrene per million parts of air by volume or 213 mg styrene per m^3 of air.

(2) Every employer using styrene-based polyester resin in conjunction with a fibrous reinforcing agent to make or repair any good, substance, article or thing, or part thereof, shall take all necessary measures and procedures by means of engineering controls, work practices and hygiene practices and facilities to ensure that the time-weighted average exposure of a worker to airborne styrene shall not exceed 100 parts styrene per million parts of air by volume, or 426 mg styrene per m^3 of air, and shall be reduced to 50 parts styrene per million parts of air by volume or 213 mg styrene per m^3 of air within three years of the filing of this Regulation.

(3) Notwithstanding subsections (1) and (2), an employer shall ensure that the exposure of a worker to styrene shall not exceed a short-term exposure concentration, measured over 15 minutes, of 200 parts styrene per million parts of air by volume or 852 mg styrene per m^3 of air.

(4) Subject to section 5, every employer shall comply with subsection (1), (2) or (3) without requiring a worker to wear and use respiratory equipment.

(5) The time-weighted average exposure of a worker to airborne styrene shall be calculated in accordance with the Schedule and the result of the calculation of the exposure may be certified by an inspector.

(6) Every worker shall work in compliance with the work practices and hygiene practices in accordance with the provisions of the control program.

(7) On a prosecution for a failure to comply with subsection (1), (2) or (3), it shall be a defence for an employer to prove that he has complied with subsection (1), (2) or (3) and that a breach of subsections (1), (2) and (3) occurred solely because a worker failed to work in compliance with the work practices and hygiene practices in accordance with the provisions of the control program and the employer has taken every precaution reasonable in the circumstances to require the worker to do so.

5. (1) Where the strict duty imposed by subsection 4(1), (2) or (3) cannot be complied with because,

(a) an emergency exists; or

(b) the measures and procedures necessary to control the exposure of a worker to airborne styrene,

(i) do not exist or are not available,

(ii) are not reasonable or practical for the length of time or frequency of exposure or the nature of the process, operation or work, or

(iii) are not effective because of a temporary breakdown of equipment,

the employer shall provide a worker with respiratory equipment which shall be used by the worker.

(2) Where a worker is exposed to airborne styrene, the worker may request a respirator regardless of the level of exposure and the employer shall provide it.

(3) Where respiratory equipment is provided by an employer and used by a worker, the respiratory equipment shall:

(a) be appropriate in the circumstances for the concentration of airborne styrene;

(b) meet or exceed the requirements set out in the Code for Respiratory Equipment for Styrene dated the 15th day of March, 1986, and issued by the Ministry; and

(c) be used in accordance with the requirements of the Code.

(4) The employer shall provide training and instruction to a worker in the proper care and use of respiratory equipment provided by the employer.

6. (1) Every employer to whom this Regulation applies shall cause an assessment to be made in writing of the exposure or likelihood of exposure in a work place of a worker to the inhalation, absorption or contact with styrene.

(2) In causing the assessment to be made, the employer shall consider and take into account such matters as,

(a) the methods and procedures used or to be used in the production, processing, use, handling or storage of styrene;

(b) the extent and potential extent of the exposure of a worker to the inhalation, absorption or contact with styrene; and

(c) the measures and procedures necessary to control such exposure by means of engineering controls, work practices and hygiene practices and facilities.

(3) In causing the assessment to be made, the employer shall consult thereon with the joint health and safety committee and the committee may make recommendations with respect to the assessment.

(4) A copy of the assessment made by an employer shall be given by the employer to each member of the joint health and safety committee.

7. (1) Where the assessment discloses or would disclose, if made in conformity with section 6, that a worker is likely to inhale, absorb or come into contact with styrene and that the health of the worker may be affected thereby, the employer shall develop, establish, put into effect and maintain measures and procedures to control the exposure of the worker to styrene and shall incorporate the same into a styrene control program.

(2) The control program shall include provisions for,

(a) engineering controls, work practices and hygiene practices and facilities to control the exposure of a worker to styrene;

(b) methods and procedures to monitor the concentrations of airborne styrene in the work place and the exposure of a worker thereto;

(c) personal records of the exposure of a worker to styrene at the work place, including the time-weighted average exposure of the worker and of the concentrations of styrene and the times in which such concentrations were taken to be representative of the exposure of the worker and used in calculating the average exposure, to be maintained by the employer; and

(d) a training program for supervisors and workers on the health effects of styrene and the measures and procedures required under the control program.

(3) The control program may include provisions for medical examination and clinical tests.

(4) In developing the measures and procedures mentioned in subsection (1) and the control program, the employer shall consult with the joint health and safety committee and the committee may make recommendations with respect to the same.

8. (1) Where engineering controls come into existence through the development of knowledge and technology and would, if adopted and implemented by an employer, reduce the exposure of a worker to or below the time-weighted average exposure limit prescribed by this Regulation, the employer shall adopt and implement the engineering controls where it is reasonable or practical to do so.

(2) Where a change is made in a process involving styrene, or in the methods and procedures in the production, use, handling or storage of styrene and the change could result in a significant difference in the exposure of a worker to the inhalation, absorption or contact with styrene, the employer shall cause a further assessment to be made forthwith and the provisions of sections 6 and 7 apply to the further assessment.

9. (1) Where disputes arise between an employer and a joint health and safety committee as to an assessment required under section 6 or 8 or as to the measures and procedures mentioned in subsection 7(1) or the control program or its provisions required under section 7 or 8, the employer, a member of the joint health and safety committee or the committee may notify an inspector thereof who shall investigate and give a decision in writing to the employer and to the member or the committee.

(2) Nothing in subsection (1) applies so as to affect the power of an inspector to issue an order for a contravention of this Regulation.

10. (1) A copy of the control program put into effect by the employer shall be given by the employer to each member of the joint health and safety committee and the employer shall acquaint every worker affected by the control program with its provisions.

(2) A copy of the control program put into effect by the employer shall be made available by the employer in English and in the majority language of the work place.

11. Subject to section 17, the procedures for monitoring, sampling and determining the concentrations of airborne styrene in the atmosphere of a work place and the exposure of a worker thereto shall be those set out in the Code for Measuring Airborne Styrene dated the 15th day of March, 1986, and issued by the Ministry.

12. The results of monitoring the concentrations of airborne styrene in the work place and the exposure of a worker thereto as provided by the control program shall be,

(a) posted forthwith by the employer, as soon as the results are available, in a conspicuous place or places at the work place where they are most likely to come to the attention of the workers affected thereby, and the employer shall keep the results posted for a period of at least fourteen days;

(b) furnished to the joint health and safety committee; and

(c) kept by the employer for a period of at least five years.

13. (1) The records of the exposures of each worker to airborne styrene at the work place to be maintained as provided by the control program shall identify the worker, including the worker's date of birth, the worker's jobs or occupations at the work place, the results of monitoring for exposure to airborne styrene in the worker's work area and the use by the worker of respiratory equipment and its type.

(2) Except where the control program includes provisions for medical examination and clinical tests the records maintained by the employer under subsection (1) shall be kept in a secure place by the employer or, where the employer is no longer able to keep the records, the records shall be forwarded to the Director, Occupational Health Branch of the Ministry to be kept for,

(a) a period of forty years from the time such records were first made; or

(b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

14. (1) Where, as a result of exposure to styrene,

(a) a worker or the worker's physician has reason to believe that the worker's health has been affected by the inhalation, absorption of or contact with styrene; or

(b) the employer believes that a worker has inhaled, absorbed or

come into contact with styrene, and the worker's health is likely to be affected thereby,

the worker shall, at the expense of the employer, undergo a medical examination and clinical tests to determine whether the worker is fit, fit with limitations or unfit to work in styrene exposure.

(2) The physician examining the worker shall be entitled to be provided with a copy of the records of the exposure of the worker to airborne styrene.

(3) Where a dispute arises between an employer and a worker as to the medical examination or the clinical tests required under subsection (1) the employer or the worker may notify an inspector thereof who shall investigate and give a decision in writing to the employer and the worker.

15. (1) Where the control program includes provisions for medical examination and clinical tests, a physician conducting the medical examination or clinical tests, or under whose supervision the examination or tests are made shall provide a report of the medical examination and clinical tests of a worker with the interpretation to be placed thereon,

(a) to the worker;

(b) to the worker's personal physician, if any, upon the request in writing of the worker; and

(c) in the case of a deceased worker, to the next of kin or personal representative of the worker, upon the request in writing of such next of kin or personal representative,

and any authorization of another person by the worker or the worker's next of kin or personal representative is of no effect.

(2) The employer shall provide a copy of the records of the exposures of the worker to airborne styrene as provided by the control program to the physician who examines the worker and under whose supervision the clinical tests of the worker are performed.

(3) The records of medical examinations and clinical tests of a worker obtained and made under the control program and of the exposures of the worker to airborne styrene furnished by the employer under subsection (2) shall be kept in a secure place by the physician who has conducted the examinations and tests or under whose supervision the examinations and tests have been made for,

(a) a period of forty years from the time such records were first made; or

(b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

(4) Where the physician is no longer able or willing to keep the records, the records shall be forwarded to the Chief Physician, Occupational Health Medical Service of the Ministry, or a physician designated by the Chief Physician and the provisions of subsection (3) shall, with necessary modifications, apply thereto.

16. (1) The physician conducting the physical examination or clinical tests under sections 14 and 15 shall advise the employer, who shall act thereon, and the worker whether the worker is fit or, because of a condition resulting from exposure to styrene, is fit with limitations or unfit for work in styrene exposure without giving or disclosing to the employer the records or results of the examination or tests.

(2) Where a worker is removed from styrene exposure because a physical exam-

mation or clinical test discloses that the worker may have or has a condition resulting from exposure to styrene and suffers a loss of earnings occasioned thereby, the worker is entitled to compensation for the loss in the manner and to the extent provided by the Workers' Compensation Act.

(3) Upon advising the employer and the worker that a worker because of a condition resulting from exposure to styrene, is fit with limitations or unfit for work in styrene exposure, the physician shall advise in writing upon a confidential basis the joint health and safety committee thereof and in giving such advice shall indicate his or her opinion as to the interpretation to be placed thereon.

(4) Where the physician advises the employer that a worker, because of a condition resulting from exposure to styrene, is fit with limitations or is unfit for work in styrene exposure, the physician shall forthwith communicate such advice to the Chief Physician, Occupational Health Medical Service of the Ministry.

17. For the purposes of this Regulation, the methods and procedures that may be used or adopted may vary from the Codes issued by the Ministry if the protection afforded thereby or the factors of accuracy and precision used or adopted are equal to or exceed the protection or the factors of accuracy and precision in the Codes issued by the Ministry.

18. (1) This Regulation, except sections 4, 5, 7, 8 and 10 to 17, comes into force on the day this Regulation is filed with the Registrar of Regulations.

(2) Sections 4, 5, 7, 8 and 10 to 17 come into force ninety days after the day this Regulation is filed with the Registrar of Regulations.

SCHEDULE

The time-weighted average exposure of a worker to airborne styrene shall be calculated as follows:

1. The average concentrations of styrene to which a worker is exposed shall be determined from analyses of air samples taken as being representative of the exposure of the worker to styrene during work operations as set out in the Code mentioned in section 11.

2. The results of the analyses are the concentrations of styrene expressed as parts styrene per million parts of air by volume or as mg styrene per m^3 of air.

3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.

4. The daily exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \ldots + C_nT_n$ = cumulative daily exposure, where C_1 is the concentration found in an air sample and T_1 is the total time in hours to which the worker is taken to be exposed to concentration C_1 in a day.

5. The time-weighted average exposure shall be calculated by dividing the cumulative daily exposure by 8.

6. The weekly exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \ldots + C_nT_n$ = cumulative weekly exposure, where C_1 is the concentration found in an air sample and T_1 is the total time in hours to which the worker is taken to be exposed to concentration C_1 in a week.

7. The weekly time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.

AIR SAMPLING METHOD FOR STYRENE

1. **Principle of the Sampling Method**

Air, possibly containing styrene, is drawn at a specified flow rate for a known duration through a glass tube containing 20/40 mesh activated charcoal. The sample is analyzed for styrene by desorption of the activated charcoal with carbon disulphide and by gas chromatographic assay of the solvent extract. In addition to personal sampling, area samples may be collected by this method by placing a sampling train on a suitable support at a strategically selected location.

2. **Equipment**

The sampling train used to obtain an air sample of styrene is to include the following components and satisfy the criteria suggested:

(1) A battery operated portable pump which:

(a) is capable of delivering, for 6-8 hours, not less than 0.20 litres of air per minute (L/min) with the glass tube containing activated charcoal in the sampling train. The maximum deviation from the prescribed flow rate is not to exceed ± 5% and it is suggested that the pump be equipped with a pulsation damper;

(b) is intrinsically safe, i.e., certified by an accepted agency as safe for use in potentially explosive atmospheres;

(c) includes a mechanism for calibration and control of flow rate;

(d) has an on-off switch and flow rate control or adjustment mechanism which are as tamper-proof as possible.

(2) A sample collection device (glass tube) which is constructed from glass tubing approximately 70 millimetres (mm) in length, 4.0 mm in inner diameter and 6.0 mm in outer diameter and which contains, in sequence, the following materials:

(a) a plug of silanized glass wool immediately behind the inlet port;

(b) 100 mg of 20/40 mesh activated charcoal in the front section;

(c) a 2 mm portion of urethane foam;

(d) 50 mg of 20/40 mesh activated charcoal in the back-up section; and

(e) a 3 mm long plug of urethane foam immediately before the outlet port.

Each tube is flame-sealed at both ends and is supplied with two plastic caps for sealing the tube after it has been used for air sampling.

(3) A tube holder which:

(a) includes an alligator clip for attachment to clothing;

(b) includes an adapter for flexible tubing to ensure a leak-proof fit for the sample collection device; and

(c) provides adequate protection against tube breakage.

(4) Tubing of sufficient length with appropriate wall thickness to prevent collapsing when air is drawn through and with appropriate inner diameter which will provide a leak-proof fit to the

tube holder and to the inlet port of the portable pump.

(5) A thermometer for ambient air temperature measurement, accurate to ± 1°C.

(6) A barometer for measuring atmospheric pressure, accurate to ± 5 mm Hg (0.67 kPa).

3. **Sampling Procedure**

(1) Preparation of pumps:

(a) The pump battery pack shall be fully charged, according to the manufacturer's instructions, before use. After a pump with a fully charged battery pack has been operated for a duration as recommended by the manufacturer, another fully charged battery pack shall be substituted for the used one if continued operation of the same pump on the same day is intended.

(b) Flow meters or constant flow devices on the pumps shall be calibrated at 0.20 L/min with the charcoal tube in line by using a primary standard, such as a bubble meter, and the recommended procedure in the manufacturer's instructions for using such a primary standard apparatus, after:

(i) not more than 40 hours of operation;

(ii) receiving unusually harsh or potentially damaging treatment;

(iii) being disassembled for maintenance.

(2) Sampling:

(a) Assemble the sampling train by connecting one end of the tubing to the inlet port of the pump and the other end to the adapter on the tube holder. The ends of the glass tube are broken to form openings of at least 2 mm before it is inserted into the tube holder.

(b) Check for air leaks in the sampling train by turning on the pump and sealing the open end of the tube. The air flow indicator on a pump with a flow meter should drop to the zero flow position and oscillate slightly. If this does not occur, find and either repair the leak if possible, or replace the faulty component.

(c) Label the tube with an appropriate sample number.

(d) Attach the pump, preferably to the worker's belt or place it in a pocket and fix the tube holder to the worker's clothing as near as possible to the breathing zone with the tube vertical and the air inlet port facing upward. Ensure that the sampling train will not interfere with the worker's normal duties.

(e) Check again that the sampling train is properly assembled and switch on the pump. Allow the flow rate to stabilize for a short duration, then adjust the rate to the pre-calibrated mark of 0.20 L/min, if the pump has a flow meter. Pumps with constant flow devices shall not be reset after the flow rate control mechanism has been calibrated to deliver air at this rate. A calibrated external flow meter

may be used to check the air flow rate.

(f) Note the following information for each sampling train:

(i) date of sampling;
(ii) company name;
(iii) model and serial number of the sampling pump;
(iv) calibration date of the sampling pump;
(v) name of worker being monitored;
(vi) job title;
(vii) work or operation performed;
(viii) tube or sample number;
(ix) air flow rate;
(x) time of initiation of sampling.

(g) Ensure that for any sampling performed during any survey, two control or blank charcoal tubes are obtained from the same source and the same batch as the sample tubes. One of the blank tubes is handled in the same manner as the sample tubes (break, seal and transport) except that no air is drawn through it.

(h) The maximum sampling duration for obtaining an air sample at 0.2 L/min shall be selected to ensure that breakthrough will not occur. A maximum sampling duration of 50 minutes would be appropriate in most cases. A shorter sampling duration should be used to avoid significant breakthrough if a high concentration of styrene and/or the presence of other organic solvent vapours is known or suspected. However, the minimum sampling duration shall be selected so that a sufficient amount of styrene is collected for the purposes of determining a time-weighted average. A minimum sampling duration of 5 minutes would be appropriate in most cases. Sampling flow rate lower than 0.2 L/min may be used for a sampling duration longer than 50 minutes, but the air volume for each sample should not exceed 10 litres. A sufficient number of sequential air samples should be taken to cover a full work shift or operation during which the worker is exposed to styrene. When it is necessary to obtain a better estimate of the worker's time-weighted average exposure, air sampling should be conducted for a sufficient number of work shifts or days in a work week.

(i) During any sampling interval, the sampling train shall be checked periodically to ensure that it is functioning properly. The air flow rate shall not be readjusted after the initial flow rate is set. If the flow rate changes significantly, terminate sampling and take another sample.

(j) The ambient air temperature and pressure in the sampling area, if required, shall be recorded at least once.

(k) When another substance is known or suspected to be present in the air, such information, including the suspected identity, should be recorded since the compound may interfere with the analysis of styrene.

(l) To terminate sampling, perform the following sequence of steps:

(i) check the air flow rate just prior to termination of air sampling;

(ii) record the time of termination of sampling;

(iii) switch off the pump and carefully remove the sampling train from the worker;

(iv) remove the glass tube and cap the inlet and outlet ports;

(v) pack the capped tubes tightly to minimize breakage and ship them to a laboratory in an airtight plastic container placed inside a thermos containing ice.

(m) Where a short-term exposure concentration determination is required, it shall be determined by following the procedure specified above but the air sample shall be taken for a period of 15 minutes. A sufficient number of air samples should be taken during the time periods when peak concentrations are anticipated from a knowledge of the work process, work operation, work cycle, or work practices.

(n) A sample of the bulk sample, known or suspected to contain styrene, should also be submitted to the laboratory in a glass container with a screw cap lined with an inert material such as polytetrafluoroethylene. This sample should not be transported in the same shipping container as the sample tubes.

4. **Analysis and Calculation of Results**

(1) Follow the analytical method entitled "Determination of Styrene on Charcoal Used for Air Sampling" in carrying out the analyses of sample tubes for styrene.

(2) Corrections of analytical results for the field blank are made for each sample, provided that the various amounts of styrene in all sample tubes are greater than the amount of styrene in the field blank tube.

(3) When the amount of styrene in the back-up section exceeds 25% of the total styrene found in both the front and back-up sections of a sample tube, there has been a significant breakthrough and the concentration of styrene determined for the sample is likely underestimated. If a significant breakthrough is found in most of the samples analyzed, the sampling strategy used should be reviewed and, if necessary, revised.

(4) The concentration of styrene in an air sample can be calculated in parts per million by volume (ppm) by using the following equation:

$$C = 0.235 \times A \times \frac{760}{P} \times \frac{T + 273}{F \times t \times 298}$$

where C = concentration of styrene in ppm
A = corrected amount of styrene in the sample tube in µg
F = air flow rate in litres per minute
T = temperature in ^{o}C
P = pressure in mm Hg
t = sampling duration in minutes

THE DETERMINATION OF STYRENE ON CHARCOAL USED FOR AIR SAMPLING

1. **Principle of Method**

(1) Air, possibly containing styrene, is drawn at a specified flow rate for a known duration through a glass tube containing charcoal to adsorb the organic substances present. The tube is then closed with the supplied plastic caps and kept cool (4°C) pending analysis.

(2) The tube is scored with a file in front of the first portion of charcoal and broken open. The charcoal is transferred to a small, stoppered sample container and the analyte is desorbed with carbon disulphide.

(3) A known volume of the solvent extract is injected into a gas chromatograph (GC).

(4) The detector response to the styrene present in the sample is determined and compared with that of appropriate standards.

2. **Apparatus**

(1) Gas chromatograph equipped with a flame ionization detector (FID).

(2) Column (3.0 m x 3.2 mm OD stainless steel) packed with 10% FFAP stationary phase on 80/100 mesh Chromosorb W/AW-DMCS.

Note: Other contaminants collected together with styrene may modify the choice of column packing. Other columns may give an equivalent performance.

(3) An electronic integrator or some other suitable method for measuring detector response.

(4) 5 mL sample containers with caps lined with an inert material such as polytetrafluoroethylene.

(5) Microlitre syringes: 10 µL and other convenient sizes for preparing standards.

(6) Pipettes: 1.0 mL delivery pipettes.

(7) Volumetric flasks: 1.0, 5.0 and 10.0 mL sizes for preparing standard solutions.

(8) Pressure-reducing valves: a 2-gauge, 2-stage pressure-reducing valve and appropriate hose connections are needed for each tank of compressed gas used.

(9) A rotary shaker.

(10) An analytical balance capable of weighing to 0.1 mg.

3. **Reagents**

(1) Carbon disulphide, chromatographic quality.

(2) Styrene, reagent grade.

(3) Purified nitrogen.

(4) Prepurified hydrogen.

(5) Predried compressed air and purified air.

(6) Deionized water.

4. **Procedure**

(1) Cleaning of equipment:

(a) Before use, all new glassware is soaked to remove any residual grease or chemicals.

(b) Glassware is cleaned by soaking in an approximately one in five dilution of concentrated nitric acid in water for at least 6 hours, and then is rinsed thoroughly with tap water and deionized water, in that order, and then dried.

(2) Analysis of sample:

(a) Preparation of sample: Each charcoal tube is scored with a file in front of the first portion of charcoal and broken open. The glass wool is removed and discarded. The charcoal in the front (larger) section is transferred to a 1 mL stoppered sample container. The polyurethane foam partition separating the front and back portions of charcoal is removed and discarded; the back portion is transferred to another stoppered container. These two portions are analyzed separately.

(b) Desorption of samples. Immediately prior to analysis 1.0 mL of carbon disulphide is pipetted into each sample container. (All work with carbon disulphide is performed in a hood.) Tests indicate that, with agitation, on a rotary shaker, desorption is complete in 30 minutes.

(c) GC conditions. The typical operating conditions for the gas chromatograph are:

(i) 28 mL/min (gauge pressure 200 kPa) nitrogen carrier gas flow.

(ii) 200°C injector temperature.

(iii) 250°C detector temperature.

(iv) 140°C column temperature.

(d) A measured volume of sample is injected into the GC and the area of the sample peak is recorded, preferably by means of an electronic integrator.

(e) All blank tubes are analyzed in accordance with the total procedure.

5. Calibration and Standards

It is convenient to express the concentration of standards in terms of mg/mL carbon disulphide. The density of styrene (0.906 g/mL) is used to convert mg into microlitres (µL) for convenient measurement with a syringe. A series of standards, varying in concentration over the range 1.0 to 20.0 mg/mL, are prepared and analyzed under the same GC conditions and during the same time period as the unknown samples. A calibration curve is prepared by plotting concentration in mg/1.0 mL versus peak area and is found to be linear over the concentration range 1.0 to 20.0 mg/mL.

Note: Since no internal standard is used in this method, the calibration curve shall be prepared on the day when the samples are analyzed.

6. Determination of Desorption Efficiency

(1) The desorption efficiency of styrene may vary from one batch of charcoal to another and from one laboratory to another. Thus, it is necessary to determine, at least once, the percentage of the styrene that is removed in the desorption process, for each batch of charcoal used. The percentage recovery is variable with the amount of styrene present and the concentration

range used must cover that found in the samples.

Note: Unless a vapour chamber is available for the preparation of suitable spiked samples, the NIOSH technique of spiking charcoal with known amounts of liquid styrene should be followed.

(2) Procedure for determining desorption efficiency:

(a) 100 mg of activated charcoal is placed into a 1 mL glass vial.

(b) A known amount of styrene is injected directly into the activated charcoal with a microlitre syringe and the vial is sealed using a screw cap with a septum faced with an inert material such as polytetrafluoroethylene.

(c) The prepared vials are allowed to stand overnight to assure complete adsorption of styrene onto the charcoal. These vials are referred to as the sample.

(d) A blank is prepared by measuring 100 mg of activated charcoal into a 1 mL vial.

(e) The sample and blank tubes are treated in exactly the same manner as the sample tube described in sections 4(2)(b) to 4(2)(d).

$$\text{Desorption efficiency} = \frac{\text{Average weight recovered (mg)}}{\text{weight added}}$$

Amount of styrene added to sample (mg)	Amount of styrene recovered (mg)	Average Recovery (%) n = 10	Desorption efficiency	% RSD
0.050	0.031	62	0.62	1.4
0.200	0.132	66	0.66	1.0
0.45	0.41	90	0.90	2.6
0.91	0.80	88	0.88	4.5
4.53	4.18	92	0.92	2.6

7. **Calculations**

(1) Read the weight, in mg corresponding to each peak area (section 4(2)(d)) from the calibration curve. No volume corrections are needed, because the calibration curve is based on mg/1.0 mL carbon disulphide and the volume of sample injected is identical to the volume of the standards injected.

(2) Corrections for the blank shall be made for each sample:

mg = mg sample - mg blank

where

mg sample = mg found on front portion of sample tube

mg blank = mg found on front portion of blank tube

A similar procedure is followed for the back-up sections.

8. **Detection Limit**

(1) The detection limit, based on a 2 µL injection, was found to be no less than 0.01 mg styrene/mL carbon disulphide.

9. **Precision**

Standard solution being measured (mg/mL)	No. of samples	Relative standard deviation (%)
0.050	10	0.8
0.91	12	3.3
4.53	12	3.8

10. **Interferences**

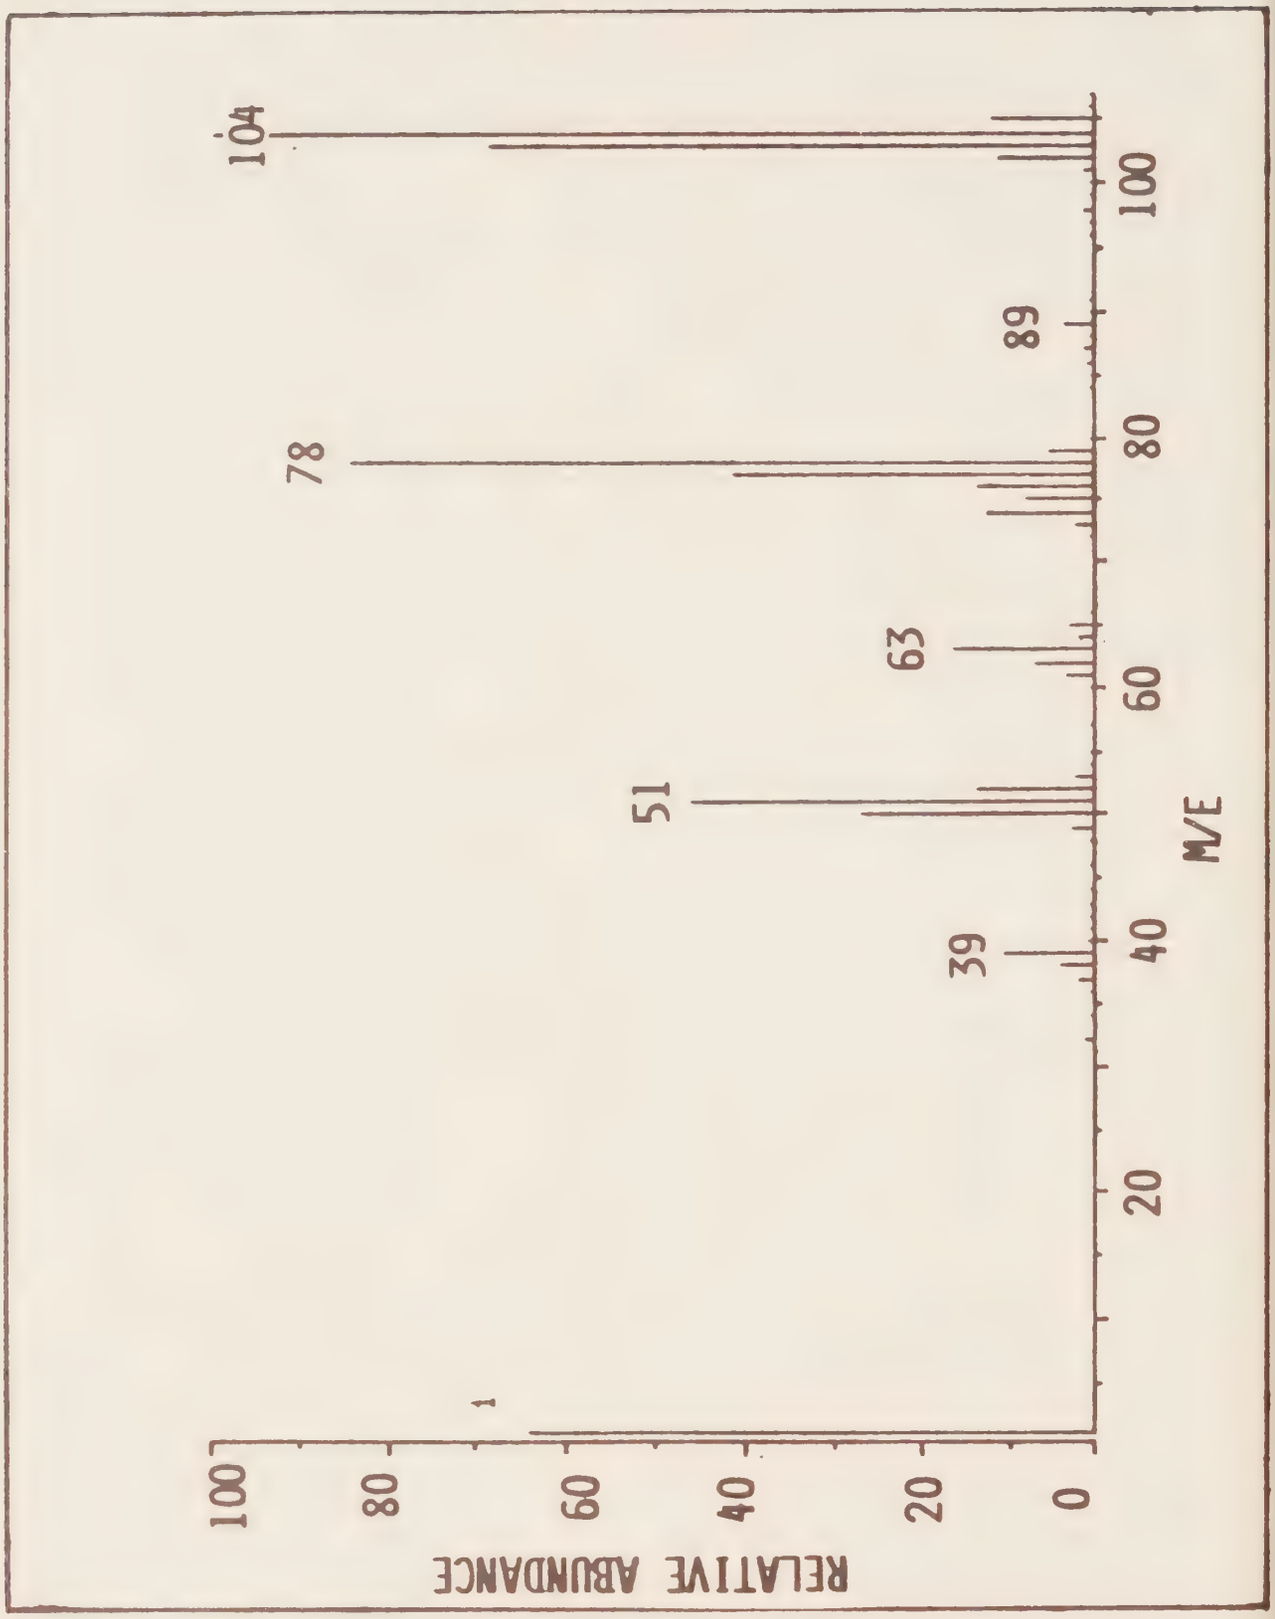

(1) Any compound which has the same retention time as styrene at the operating conditions described in this method may interfere. Retention time data for a single GC system does not provide proof of chemical identity; a mass spectrum of the sample may serve to confirm identity (see attached spectrum).

Note: The data listed in sections 6, 8 and 9 were obtained on a Hewlett-Packard 5840A Gas Chromatograph.

The mass spectrum was obtained on a Hewlett-Packard 5985 GC/MS system.

The equipment listed above is specified for clarification purposes only and should not be taken as an endorsement by the Ministry.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 97/86.
Exemption—The Metropolitan Toronto and Region Conservation Authority—MTRCA-3.
Made—February 19th, 1986.
Approved—February 19th, 1986.
Filed—February 25th, 1986.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—THE METROPOLITAN TORONTO AND REGION CONSERVATION AUTHORITY—MTRCA-3

Having received a request from the Metropolitan oronto and Region Conservation Authority that an ndertaking, namely:

The construction and operation at the Claireville Conservation Area, of an artificial swimming facility and water play area, with associated support buildings and complementary dry land facilities,

e exempt from the application of the Act pursuant to ction 29;

nd having been advised by the proponent that if the ndertaking is subject to the application of the Act, the llowing injury, damage or interference with the per- ns and property indicated will occur:

A. The Metropolitan Toronto and Region Conservation Authority will be damaged and interfered with because of the expense of preparing an environmental assessment for a project which will have no significant adverse effects on the environment.

B. The Metropolitan Toronto and Region Conservation Authority will be damaged and interfered with because it will lose the opportunity of having Leigh Simpson Water Parts Ltd. invest in the design, development and operation of a water park at Claireville.

C. The people residing within the area under the jurisdiction of the Metropolitan Toronto and Region Conservation Authority and the tourists visiting this area will be damaged and interfered with because the Claireville Conservation Area will not be able to offer swimming opportunities to replace those lost as a result of deteriorating water quality in the Humber River.

D. The Metropolitan Toronto and Region Conservation Authority and its member municipalities will be damaged and interfered with by the continuing loss of revenues, resulting from the lack of swimming at the Claireville Conservation Area. The net cost of operation will eventually force the closure of this Area.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. The proposed development conforms with the original master plan for the area, which was approved by the Province and the Authority's member municipalities.

B. The project has been endorsed by the Metropolitan Toronto and Region Conservation Authority full membership and the following municipal councils:

Region of Peel
City of Brampton
City of Mississauga.

C. The proposed development does not represent a change in the nature of use or the design capacity of the site and, therefore, is not in conflict with the environmental goals, objectives, plans, standards criteria or guidelines established by the Province or local municipalities.

D. The proposed development will not have any significant adverse effects on the environment.

E. The water park will occupy less than one per cent (1%) of the existing Claireville Conservation Area.

F. The development is not a pre-condition to any other development.

G. Since the water park will utilize many of the existing facilities on the site, alterations to accommodate the facility will be minimal.

H. Market analysis indicates a high demand for this type of facility within the Metropolitan Toronto Region.

I. The projected peak daily attendance for this facility of 3,500 persons will not adversely affect traffic patterns and use of existing roads within the area.

J. The proposed development will complement and enhance local and regional recreational opportunities.

This exemption is subject to the following terms and conditions:

(i) "current cost of operating",

(ii) "elementary school pupil",

(iii) "eligible sum for French as a first language",

(iv) "eligible sum for French as a second language",

(v) "non-resident pupil",

(vi) "O.E.",

(vii) "P.A.C.",

(viii) "R.O.E.", and

(ix) "resident-internal pupil",

except that in respect of a board appointed under section 70 of the Act, "current cost of operating" does not include current expenditure for furniture and equipment and for debt charges;

(*b*) "A.D.E." means average daily enrolment calculated under Ontario Regulation 127/85 (Calculation of Average Daily Enrolment);

(*c*) "technological studies" means the courses developed from curriculum guidelines that are issued by the Minister for the intermediate division and senior division and listed under the heading "Technological Studies" in circular H.S. 1 or in the circular entitled "Ontario Schools Intermediate and Senior Divisions Program and Diploma Requirements" issued by the Ministry.

(2) Where a board of education provides instruction for one or more pupils in respect of whom fees are receivable, the fees shall be calculated under this Regulation as if the board of education were a public school board and a secondary school board. O. Reg. 115/86, s. 1.

2.—(1) Subject to subsection (2) and to sections 3 and 6, where a board provides instruction for pupils whose fees are receivable from another board, from Canada, or from a band, council of a band or education authority authorized by the Crown in right of Canada to provide education for Indians, or where the board provides instruction for a pupil to whom subsection 48 (6) of the Act applies, the fees for a year in which it provides the instruction shall be calculated by,

(*a*) subtracting from the current cost of operating for the year of the board that provides the instruction, the grant payable to such board in respect of the eligible sum for French as a first language and for French as a second language for that year for the board, and dividing the difference so obtained by the sum of the average daily enrolment in respect of resident-internal and non-resident pupils of the board,

(i) calculated under section 2 of Ontario Regulation 127/85 (Calculation of Average Daily Enrolment),

(ii) calculated under section 3 of Ontario Regulation 127/85 (Calculation of Average Daily Enrolment) in respect of pupils taking a course for which credit is granted, in respect of the classroom instruction portion of a course in driver education, in respect of basic literacy or basic numeracy for adults, in respect of citizenship and language instruction for landed immigrants, and in respect of English or French as a second language for adults whose first language is neither English nor French,

(iii) calculated under section 4 of Ontario Regulation 127/85 (Calculation of Average Daily Enrolment) in respect

of pupils taking a course for which credit is granted and in respect of a course of study acceptable to the Minister that the board is authorized or required to provide in its day school program in grades 1 to 8 or in a school or class for trainable retarded pupils; and

(*b*) multiplying the A.D.E. for the year of the pupils whose fees are receivable from the other board, from Canada or other previously described source, as the case may be, by the sum of,

(i) the amount determined under clause (*a*), and

(ii) except where the board that provides the instruction is a board appointed under section 70 of the Act, the P.A.C. for such pupils.

(2) Where a board has entered into an agreement under subsection 165 (2) of the Act that provides for a payment by the Crown in right of Canada to provide classroom accommodation for a specified number of pupils, the P.A.C. for each such pupil, notwithstanding subclause 1 (1) (*a*) (viii), shall be zero. Where a board appointed under section 70 of the Act operates a school in a centre for the treatment of cerebral palsy, a crippled children's treatment centre, a hospital or a sanitorium and provides instruction therein for pupils whose fees are receivable from any source, the fee for such a pupil shall be calculated by,

(*a*) adding to the current cost of operating of the board for the year in which it provides the instruction, the portion approved by the Minister for grant purposes of the expenditure for such year for the transportation of pupils, and deducting from the total thereof the general legislative grants payable to the board for such year except a grant that is equal to the cost of education;

(*b*) dividing the amount determined under clause (*a*) by the sum of the days on which each pupil is enrolled at the school; and

(*c*) multiplying the amount determined under clause (*b*) by the number of days for which the pupil whose fee is being calculated is enrolled at the school. O. Reg. 115/86, s. 3.

4. Where a board, except a board appointed under section 70 of the Act, provides instruction for a pupil in respect of whom fees are required to be paid, other than a pupil whose fees are receivable from another board or from Canada or from a band, council of a band, or education authority authorized by the Crown in the right of Canada to provide education for Indians, and the parent or guardian of the pupil is resident in Ontario, the fees payable on behalf of the pupil shall be such as the board may prescribe except that in the case of each of a public school board, a separate school board and a secondary school board, the total fees charged, in respect of a year,

(*a*) to a parent or guardian who is not resident in a school section, separate school zone or secondary school district, in respect of his or her children or wards who attend the board's schools, shall not exceed $58.00 per month during which such children or wards are enrolled at the board's schools; and

(*b*) in the case of a pupil who is qualified to be a resident pupil of a school section, separate school zone or secondary school district, shall not exceed, in respect of each month the pupil is enrolled, the greater of,

(i) $58.00, and

(ii) one-tenth of the sum of,

(A) the quotient obtained by dividing,

I. the board's estimate of the excess of its O.E. for the year over its R.O.E. for the year,

by

II. the A.D.E. of the board for the year that is in respect of resident-internal pupils of the board,

and

(B) the P.A.C.,

except that where the pupil is enrolled in a high cost program as defined in section 6, such greater amount may be increased by an amount which takes into account the additional cost to the board of providing such program. O. Reg. 115/86, s. 4.

5. Where in any year a board provides instruction for a pupil in respect of whom fees are required to be paid and whose parent or guardian does not reside in Ontario, except a pupil to whom subsection 48 (6) of the Act applies, the fees payable by or on behalf of the pupil shall be such as the board may prescribe but, subject to subsection 6 (5), shall not exceed the product obtained by multiplying one-tenth of the sum of the quotient determined under clause 2 (1) (*a*) and the P.A.C. for the pupil by the number of months during which the pupil is enrolled in such year in a school operated by the board that provides the instruction. O. Reg. 115/86, s. 5.

6.—(1) In this section "high-cost program" means,

(*a*) a special education program other than a program provided in the board's school in lieu of an education program provided by a provincial school for the blind and the deaf or such other program approved by the Minister for which a General Legislative Grant is payable;

(*b*) a program for trainable retarded children;

(*c*) a program that includes technological studies that qualify in a school year for three or more credits toward the secondary school graduation diploma or Ontario secondary school diploma;

(*d*) a program of instruction for which credit is granted that is offered in an elementary school to elementary school pupils as defined in subparagraph i of paragraph 12 of section 1 of Ontario Regulation 116/86, General Legislative Grants, 1986; and

(*e*) a program of instruction for which credit is granted that is offered in an elementary school to elementary school pupils as defined in subparagraph ii of paragraph 12 of section 1 of Ontario Regulation 116/86, General Legislative Grants, 1986.

(2) The fee calculated under section 2, where chargeable by a board in respect of an elementary school pupil who is registered in a high cost program, or a pupil enrolled in a school or class for trainable retarded pupils other than a trainable retarded pupil who does not have the right to attend under subsection 73 (1) of the Act, may be increased by multiplying it by a factor agreed upon by the fee payor and the board charging the fee when,

(*a*) the ratio of the A.D.E. of such pupils registered in a high cost program for whom fees are receivable by the board from such fee payor to the A.D.E. of elementary school pupils or trainable retarded school or class pupils registered in such high cost program conducted by the board,

is greater than,

(*b*) the ratio of the A.D.E. of such pupils for whom fees are receivable by the board from such fee payor to the A.D.E. of elementary school pupils and trainable retarded school or class pupils registered at the board's schools.

(3) The factor agreed upon under subsection (2) shall not be greater than 1.23 in the case of a pupil registered in a program referred to in clause 6 (1) (*d*) and 1.36 in the case of a pupil registered in a program referred to in clause 6 (1) (*e*).

(4) Subsection (2) applies with necessary modifications to secondary school pupils.

(5) Where a pupil to whom section 5 applies is registered in a high cost program, the maximum fees payable in respect of such pupil shall be determined by multiplying the maximum fees under section 5 by a factor to be agreed upon between the board that provides the instruction and the party from whom the fees are receivable.

(6) Where under this section the board that provides the instruction and the other board or party concerned cannot agree upon a factor, the factor shall be determined by three arbitrators, one arbitrator appointed by the board that provides the instruction, one arbitrator appointed by the board from which or the party from whom the fee is receivable and one arbitrator appointed by the Minister, and the decision of the arbitrators or a majority of them is final and binding upon the board that provides the instruction and the other board or party concerned. O. Reg. 115/86, s. 6.

7. Where a board, except a board appointed under section 70 of the Act, provides an education program in a hospital or treatment centre, other than a program for which the board receives General Legislative Grants equal to the salaries of the teachers conducting the program and other program expenditure allowances, the fee payable in respect of a pupil who is not qualified to be a resident pupil of the board and for whom such an education program is provided shall be such as may be agreed upon between the board that provides the program and the parent or guardian of the pupil or the board of which the pupil is qualified to be a resident pupil. O. Reg. 115/86, s. 7.

8. This Regulation applies to fees for pupils in respect of the year 1986. O. Reg. 115/86, s. 8.

2.
